# PITTSBURGH PLATE GLASS COMPANY

GENERAL OFFICES ~ GRANT BUILDING

PITTSBURGH, PA.

E. D. PECK  
GENERAL PAINT MANAGER

To: Pittsburgh Agency Connections

The record of the Pittsburgh Plate Glass Company in regard to its trade sales Paint business during the distressing days of the global war, may be simply expressed:

1. P.P.G. manufactured the finest finishing materials restrictions allowed, and was able to maintain performance characteristics of products at a high level because of fundamental research programs carried on for years, which resulted in new knowledge and permitted the Technical Department to do outstanding product development work.

Noteworthy among these accomplishments were the additional vitolized oils the Company produced and the molecular selection process which enabled P.P.G. to improve upon the raw materials of nature and thus satisfactorily replace many vehicles formerly obtainable only from foreign sources.

These factors, plus many others, made it possible for P.P.G. to market, through its loyal distributors, finishing materials which afforded optimum protection to America's priceless property: homes, buildings and factories.

2. P.P.G. did not, during the war period, change its type of distribution or concentrate on any one product merely because it required the minimum of fats and oils, but made every effort to supply protective coatings of various kinds in accordance with past usage and actual demand.

3. P.P.G. endeavored to serve its established agencies well, and despite the overall restricted use of raw materials, found ways to provide its accounts with a gratifying number of gallons of Paint and Varnish Products, compared to the quantity furnished in the pre-war era.
4. P.P.G. maintained the impact force of its advertising program, as experience clearly proves it takes repeated impressions, over years, to influence the thinking of the great American public, and to secure adequate results.

Money expended on promotional work during the war period will be of decided benefit to the distributors of Pittsburgh Paints in the years to come.

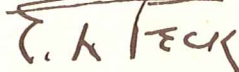

5. P.P.G. maintained its customer contact in a systematic manner, and offered practical advice in marketing its products.

Frankly, there are no substitutes for the clear-cut objectives of P.P.G. involving . . . sound practice . . . continuity of policy . . . fundamental research . . . product development work in advance of requirements to insure satisfactory finishing materials for the ever changing variety of construction projects . . . outstanding manufacturing equipment . . . the highest possible concept of quality . . . a desire to extend business through established agencies, serving proper areas and groups of population . . . consistent advertising . . . intensive territory coverage by well informed representatives . . . and an unparalleled distribution system which in normal times assures prompt delivery of merchandise regardless of the size of the job.

Therefore it is a pleasure to announce, through the issuance of this brochure, Pittsburgh's Postwar Products. The line is compact, the colors modern, scientifically chosen, and possess maximum beauty; the variety is ample to serve the trade, insuring a rapidity of turnover which will prevent the gradual accumulation of obsolete items, thus assisting any efficient firm to rapidly and profitably expand its Paint and Varnish business.

Factually, any mercantile establishment would be wisely counseled, in marketing finishing materials, to concentrate on the Pittsburgh line, as the quality will always be high and the business cooperation accorded, complete.

Very truly yours,

General Paint Manager
